

Colour	Product	Precious Metal Content	Vetrosa	Notes*
			high firing temperatures, approx. 900-1000°C/1650-1830°F	
white	GPP 4601	8%		also suitable for fast firing, wide firing range, also for decals
white platinum	GPP 4302	9%	●	also suitable for fast firing, wide firing range, excellent printing properties, excellent mechanical and chemical resistance
platinum	GPP 4386/HT	11%	●	high temperature bright platinum paste, for soft tile glazes, can be fired with colours of series H 6600 and H 6000 as well as next to vetrosa in one fire, excellent mechanical resistance
platinum	GPP 4382/HT	9%	●	high temperature bright platinum paste, for hard tile glazes, can be fired with colours of series H 6600 and H 6000 as well as next to vetrosa in one fire, excellent mechanical resistance
platinum	GPP 4331		●	well-priced preparation, excellent printing properties, excellent mechanical and chemical resistance
platinum	GPP 4328	4%	●	normal firing
platinum	GPP 4332			most reasonable preparation
